the have done American infant No Let-up in Campaign Is to Be Shown Until Goal Is Reached; Hard Work Ahead

President R. E. Pittney last night showed plainly the gratification that he felt at the result of the first day's salp of night scason tickets to the falt, but at the same time made it clear that the fight is not over and that there is pleuty of hard work yet to be done by

those who have the interest of the fair at heart.
"We have hardly gotten started yet," said Mr. Putney. hardest work is still to be done. We must not said will not let up until we have passed the mark that we have set for ourselves. Everybody worked hard today, and all the workers deserve the gratitime of the city; but this is just the beginning of things, and the fact that we did well on the first day must not cause us to get the idea that we have finished.

"I want once more to impress upon the people of Albaquerque," he continued, "that in making this sale we are not asking them to give as anything. On the contrary, we are offering them the biggest bargain in the way of amusement features that they have ever had presented to them. I also want to remind them that the men who will call upon them to buy tickets are not getting one cent of remuneration, that they have no axes to grind and that they are giving liberally and royally of their own time and money to make a success of an enterprise that will work to the good of the whole people, not only of Albuquerque but of the state. I therefore once more urge the people to meet the committees with a glad hand and a cheerful word and give them every encouragement possible in the work that they are doing."
